UNIVERSITÉ SULTAN
MOULAY SLIMANE

2018 - 2022

1337 FUTURE IS LOADING

2021 - 2024

LANGUAGES

ARABIC

Full professional proficiency

ENGLISH

Limited working proficiency

PROFILE

A dedicated and aspiring Software Development Engineer with the objective of working in an organization that provides opportunities for technical and personal advancement.

PERSONAL PROJECTS

WEB SERVER USING C++

Simply it is a software application that runs on a computer and listens for incoming requests from clients over the internet or a local network. When a client such as a web browser sends a request for a webpage the web server receives the request processes it and sends back the requested webpage as a response.

INCEPTION - DOCKER

Inception is a project aimed at setting up a WordPress website within a Docker container. The setup includes integrating a MariaDB database for efficient data storage and retrieval. By utilizing Docker, the project aims to streamline deployment and management processes, making it easier to maintain a consistent and isolated development environment.

FT_TRANSCENDENCE

This project is about creating a website for the mighty Pong contest! with live chat and authentication with Nextjs, Nestjs Frameworks, and PostgreSQL database
